Between McKinley and Vliet St. -- MILWAUKEE, WISCONSIN

Vegetable Seed Trials

D. N. Shoemaker

JAN 25 1930

Armour's Big Crop Fertilizers

FERTILIZERS ARE PLANT FOOD CARRIERS

Nitrogen, referred to as Ammonia, is directly associated with the formation of leaves and stems in plants, promoting a quick and vigorous growth which is accompanied by a deep, rich green color of foliage—a sign of health and activity.

Phosphorus, known as Acid Phosphate or Phosphoric Acid, hastens germination and favors rapid development of young seedlings, increasing the root growth, thus giving the young plant a good start. The formation of grain and fruit begins sooner when applications of soluble phosphorus are freely made. Phosphorus fills out the grain and fruit, increasing the proportion of grain to straw.

Potassium, commonly called potash, has a marked influence upon the development of leaves and stems. When potash is lacking, stems are apt to be weak and brittle. Potash enables the plant to produce sugar and starch, and helps to plump and fill the grain. It is also necessary in developing the fleshy parts of fruit.

O. Machholz Wholesale List for 1930

All Previous Price Lists Are Hereby Cancelled

PRICES SUBJECT TO CHANGE WITHOUT NOTICE

I HAVE again the pleasure of presenting to you my catalogue for the coming season, and hope you will be induced by the extremely low prices to favor me with your orders which shall have my careful and prompt attention.

All my seeds have been selected with the utmost care and attention, therefore I am sure of their superior quality. No complaint can be entertained unless made on receipt of the goods and invoice, and no warranty or guaranty is given either as to description, quality, productiveness or any other matter of any seeds I send you, nor will I be responsible for the quality or value of the crops produced therefrom. Nevertheless I will certainly pay attention to any founded complaint, but a restitution of any article can never exceed the amount charged for in the invoice.

Being able and ready to meet all respectable competition, I would be glad to be informed if you are offered any article lower than these prices, and in such cases, I will, if possible, give you other quotations.

A new and adequate Parcels Post law now applies to shipments of seeds, bulbs, tools, plants and garden supplies to all of the United States; packages are subject to a limit of maximum weight in the first and second zones of 50 lbs.; and in all other zones, third to eighth, of 20 lbs. The maximum size of a package is 72 inches for combined length and largest girth. Insurance will be affected only when asked for and remitted for as follows: Parcels to the value of \$25.00 or under 5 cents; to the value of \$25.00 to \$50.00 for 10 cents. Postage must be remitted in addition to the price of seed.

**ALL ACCOUNTS ARE DUE AND PAYABLE ON JUNE 1ST
unless otherwise agreed upon.**

References as to quality of seeds sold by me; any of the leading market gardeners in the vicinity.

Respectfully,
O. MACHHOLZ.

ALL LEADING VARIETIES OF FLOWER SEEDS

All Orders Promptly and Carefully Executed

NOVELTIES

CARROT

"Chantenay Red-Cored"

A special strain, with shorter tops and the foliage finer cut than regular Chantenay. The exterior color is a rich orange, decidedly deeper than ordinary run of Chantenay and the cores are small and nearly the same color as the flesh, also a little earlier in maturity.

The roots grow about $5\frac{1}{2}$ to 6 inches long, are 2 to $2\frac{1}{2}$ inches in diameter at the shoulder, and are broad at the bottom.

CELERY

"Golden Phenomenal"

The general characteristics are those of Golden Plume, but it is taller, and the stalks are much longer to the joint. The stalks run 27 to 28 inches overall and from 8 to 9 inches to the joint. The stems are broad and thick, brittle and free from strings, of fine flavor and of excellent quality all through.

SQUASH

"Giant Summer Straightneck"

A selection from the crookneck squash but with a straight rather than a crooked neck, and thus being more easily packed for shipment. Fruits intensely warted, 18 to 20 inches long, deep orange in color with a thick, meaty neck.
